As a passionate and driven Software Engineer with nearly a year of hands-on experience, I am eager to bring my skills and enthusiasm to a dynamic team. My recent project involved developing a CRM system using the Django framework, where I contributed across the full stack to deliver a solution. This project honed my abilities in both front-end and back-end development, and provided me with a strong foundation in creating efficient, user-friendly applications.

SKILLS

Python

Django

FastAPI

HTML

CSS

PyTest

Selenium
